

0702L Setup On Windows 10

Executive Summary

This procedure explains how to setup the 0702L monitor in extended mode on an Elo I-Series with Windows 10. This will most likely work on all Elo AIO products running Windows 10 but has only been tested with the I-Series i5 unit.

Procedure

- 1. Connect the 0702L's USB cables to the Elo I-Series.
- Typically, Windows 10 will auto install the DisplayLink drivers. If for some reason it does not, go to <u>www.displaylink.com</u> and download and install *Windows 10 v1506/1511 TH1/TH2*: <u>https://www.displaylink.com/downloads/file?id=1245</u>
- 3. The displays should automatically default to extended mode setup, if they do not, go into the Windows display properties and choose "*Extend these displays*."

Settings	
Home Find a setting P System	1 2
🖵 Display	<u> </u>
IΞ Apps & features	Identify Detect Connect to a wireless display
i∃ Default apps	Change the size of text, apps, and other items: 150% (Recommended)
Notifications & actions	Orientation
O Power & sleep	Landscape \vee
📼 Storage	Multiple displays
成 Offline maps	Extend these displays

7. When the dialog appears "*Press Enter to proceed to the next step to complete your configuration*" press *Enter* on the keyboard.

8. When the dialog appears on the 0702L "*Touch this screen to identify it as the touchscreen*" touch the 0702L screen.

9. You can now close the Tablet PC settings and touch should be working on both units as expected.
