

Device Groups

To more-effectively manage devices that share similar settings or applications, put them into the same device group. You can group devices together based on location (store, city, region), business type (retail vs. outlet, bar/restaurant vs. quick service), or even customer account. Once created, a group will initially inherit all default settings from the account. But if changes are made to the group, they effectively overwrite the account-level settings.

Setting	Account	Group	Device
Brightness	50%	50%	50%
Volume	1%	1%	1%
Orientation	Landscape	Portrait Landscape	Portrait
Virtual Keyboard	Disabled	Enabled Disabled	Enabled

Creating a Device Group and Establishing Group Settings

1. Login to the EloView website – <https://manage.eloview.com>
2. In the “Devices” section, click the **Device Groups +** button.
3. Specify a group name and click the **Done** button
4. Select one or more devices from the device list and drag-and-drop them to the group
 - Note: a device can only be assigned to a single group

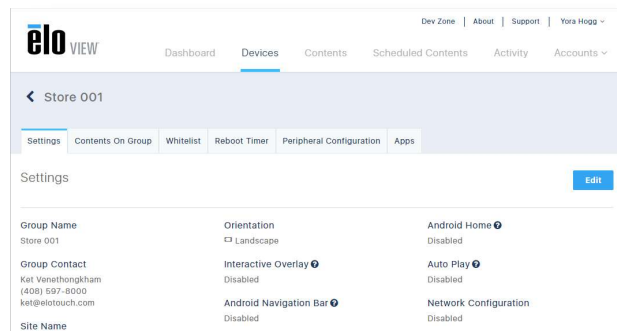

5. Click the **Yes** button to confirm

6. Click the **Settings** icon next to the group name

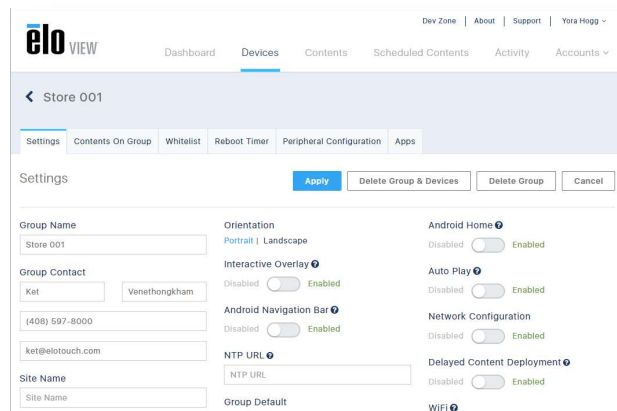

7. On the “Settings” tab, click the **Edit** button

8. Establish all appropriate settings that will apply group-wide (across all devices within the group).

- Group Name
- Group Contact
- Site Name
- Software
- Brightness
- Volume
- Control Panel Password
- Access Restriction Password
- Touch Sound
- Orientation
- Interactive Overlay
- Android Navigation Bar
- NTP URL
- Display Timer
- Physical Analytics
- Remote Control
- Time Zone
- Android Home
- Auto Play
- Network Configuration
- Delayed Content Deployment

- Wi-Fi
- Home Button
- Power Button
- Device Screenshot
- Virtual Keyboard
- Reboot Devices
- Enterprise Reset
- Language

9. When done, click the **Apply** button.
