Product Notice: New 03LM Medical Monitors Without Stands

Product Information

To support our customers and the needs of the market, the latest 03LM Medical Monitors are now available without stands as well as with stands. The standard VESA mounting holes support a variety of mounting needs, including on an arm, wall or medical device.

Positioned for applications in the secondary display non-diagnostics medical market, the monitors are pre-calibrated from the factory to the DICOM 14 standard, offering image consistency and accuracy as well as serial (RS232) touch support via the VGA connector. And for ease of cleanability, the medical monitors offer edge to edge touch glass and sealed plastics with an IP54 rating.

Inventory and Ordering Information

Please consult with your sales representative for specific part numbers, details and sample availability.
