Product Management Bulletin
Number: 000-791

Product Notice:
0702L Touchmonitor

Product Information

In order for the 0702L to maintain compliance with EU EcoDesign requirements, Elo will be removing the power button on the display. While there is an update to the manual functionality of the product, the form and fit remains unchanged and the performance and functionality will not be affected. The product will continue to ship in the Power ON state and on/off control will continue to be supported from the host. This provides continuity and compliance for our global customer-base in the market today.

Inventory and Ordering Information

- Product changes are rolling into the existing SKU.
- Please consult with your sales representative for specific part numbers, details and sample availability.
- The new configuration may not be electrically or mechanically identical to the previous configuration.
